on

November 7th - 8th, 2025

at

NIO Auditorium,
CSIR - National Institute of Oceanography,
Raj Bhavan Road, Dona Paula - 403 004, North Goa.

Background

India is a world leader in milk production and consumption since 1998 and likely to be Dairy to the world in near future. At present, India produces about 24% of the total world milk production amounting to 239.3 million tonnes showing about 5% increase over last year. Out of the total milk produced, only 25-30% is handled by organized sector and hence there is a tremendous scope for the dairy industry to grow and serve the nation by providing safe and secure milk and milk products to the consumers. **Indian Dairy Association** is working to help various stakeholders connected to dairy for overall promotion of dairy sector.

About Goa

Goa State Cooperative Milk Producers' Union "**Goa Dairy**" was established in the year 1984. A member owned Federal Body of 178 Rural Dairy Co-operative Societies spread all over the State of Goa, having 19,100 farmer families as their members procuring presently on an average about 65,000 liters of milk per day. A Co-operative Institution, having modern Dairy Plant of 1,10,000 liters per day capacity, supplying 95,000 liters of milk per day to the urban/semi urban consumers through 440 Milk Booths and 850 full time Distribution Agencies. Goa Dairy also has a modern Cattle Feed Plant, manufacturing around 12,500 M. T. of High Protein, Bypass Cattle Feed, Calf Ration & Pregnancy Ration per annum to cater to the nutritional requirements of milch animals of this State. Despite the efforts of the Goa Dairy, the amount of milk procured locally is a fraction of what is consumed daily for various reasons like a declining interest among the local youth in dairy farming, fragmented land holdings, and a lack of cooperative farming initiatives. This forces the state to import the vast majority of its dairy supply from neighbouring states, particularly Karnataka and Maharashtra from brands like Nandini and Amul.

About IDA

Established in 1948, Indian Dairy Association (IDA) is the apex body of the dairy industry in India. The members are from the cooperatives, MNCs, corporate bodies, private institutions, educational institutions, government and public sector units. IDA functions very closely with the dairy producers, professionals & planners, scientists & educationists, institutions and organisations associated with the development of dairying in India. IDA (West Zone) is actively engaged in promoting dairy sector in five major states of India, viz., Gujarat, Maharashtra, MP, Chhattisgarh and Goa. We are committed to help all our stakeholders, starting from primary milk producer to all in the supply chain and the consumers. It is our moral duty to protect the interest of millions of farmers, who are dependent on milk business and at the same time protect the interest of millions of consumers by providing them healthy, wholesome milk products.

« Theme of the Seminar »

The program will be focussed on the Dairy Development in Goa, and how different stakeholder can play a role to take dairying to the next level. Issues related to milk production, productivity, animal and veterinary care and management, feed and fodder supply, logistics, procurement, milk processing capacities and technologies, quality and safety, marketing issues, gobar management, sustainability, etc. will be discussed by eminent experts in the field.

« Who can Participate »

Anybody connected to dairy sector in the country can participate. This will include the dairy farmers, entrepreneurs, processors, packers, policy makers, government officials, research and development institutes, students, consultants and all dairy professionals.
