Seminar on

Global Market Opportunities for Indian Dairy Sector

December 5-6, 2024, Grande C, Bombay Exhibition Centre, Mumbai

IDA (West Zone) is organizing a two-day seminar on “Global Market Opportunities for Indian Dairy Sector” during 5-6 December 2024 at Bombay Exhibition Centre, Mumbai, India concurrent with Inter Dairy - 2024. The objective is to explore, discuss, share and develop a strategy for promoting export of dairy products from India for managing the increasing milk production and better revenue generation. Industry and academic experts will present innovations across various areas of the dairy sector, from milk production management to processing technologies and marketing. Discussions will also cover issues related to quality, safety, and regulatory compliance. Significant developments have been made in India in value-added dairy products, dairy-based ingredients, energy savings, digitalization, artificial intelligence, IoT, blockchain, packaging, and environmental protection. The seminar will provide a platform for stakeholders from India and abroad to showcase these advancements, contributing to the overall development of the dairy sector. Selected successful start-ups and young researchers from academia and industry will have opportunities to present their work during poster sessions.

India holds a strategically advantageous position among the world's five major milk-producing regions. Countries to the east, including Bangladesh, Myanmar, China, Cambodia, Vietnam, Thailand, Indonesia, Malaysia, Singapore, and the Philippines are largely milk-deficit. Similarly, countries to the west, such as Oman, Saudi Arabia, Qatar, Kuwait and Egypt also face milk shortages. Over the next 25 years, as India's annual milk production approaches 600 million metric tonnes (MMT), roughly 40-45% of global production, we anticipate a surplus of approximately 100 MMT, a significant portion of which we aim to export. Despite currently accounting for less than 1% of global dairy exports, India possesses tremendous potential for further growth. Beyond milk and milk products, there is considerable potential for export of Indian dairy equipment, vaccines, semen doses, Indian breeds, and expertise in training.

We cordially invite you to join this technical summit and explore the expansive exhibition, Inter Dairy, which will be held over three days.

Indian Dairy Association

Established in 1948, the Indian Dairy Association (IDA) serves as the apex body of the dairy industry in India. Its members include cooperatives, multinational corporations, corporate bodies, private institutions, educational institutions, government agencies, and public sector units. IDA works closely with dairy producers, professionals, planners, scientists, educationists, and organizations dedicated to dairy development in India. IDA (West Zone) actively promotes the dairy sector across Gujarat, Maharashtra, Madhya Pradesh, Chhattisgarh, and Goa, aiming to support stakeholders throughout the supply chain, from primary milk producers to consumers. It is our ethical responsibility to safeguard the interests of millions of farmers reliant on the dairy industry, ensuring the provision of healthy, wholesome dairy products. IDA endeavors to unify all stakeholders connected with dairying under one umbrella.

Recognizing the growth potential of the Indian dairy industry and its sourcing needs, VA Exhibitions Pvt. Ltd. is organizing Inter Dairy - an international exhibition covering the complete dairy value chain from December 5-7, 2024, at the Bombay Exhibition Centre, Mumbai, in collaboration with IDA (West Zone). Inter Dairy will offer new business opportunities to all stakeholders of the dairy industry under one roof. Concurrent events such as seminars, B2B meetings, CEO Conclave, and a job fair will further enhance understanding of industry trends and potential solutions to challenges faced by the Indian dairy sector. VA Exhibitions Pvt. Ltd., with over 25 years of experience, specializes in conceptualizing, promoting, and organizing successful trade fairs across multiple industry segments.

Plan of Activities

We plan a grand **inauguration** of the exhibition in the presence of eminent dignitaries and policymakers followed by inaugural program of the seminar. The program will include **panel discussions** with policy makers, industry experts and professionals on overall dairy development in India with special focus on export potential of dairy products, machinery and services. Government initiatives on White Revolution 2.0 and many central and state level schemes will be discussed. Innovations in product and process development, sustainability, digitalization, quality and safety of products will be discussed. A special session with dairy startup will also be organized. **Awards** will be presented to recognize achievements/innovations in the areas of processing and technology, sustainability, product development apart from best start-up will be presented. To increase the awareness about dairy among the students, a quiz contest is also planned.

Schedule

5 th December		6 th December	
09.00-10.00	Registration	09.00-10.00	Registration
10.00-11.30	Inauguration of Exhibition and Seminar	10.00-11.30	White Revolution 2.0 and export promotion
